PROFESSIONAL SUMMARY

As an SQL Integration Project Manager, I specialize in bridging the gap between complex enterprise systems and delivering actionable data to clients. My expertise lies in designing, developing, and implementing robust SQL-based integrations, primarily within the Microsoft SQL Server environment.

I'm adept at creating efficient views, stored procedures, functions, and tables to ensure seamless data flow between systems, particularly between ERP platforms and client-facing applications.

Beyond the technical aspects, I excel in project management, overseeing the installation and configuration of systems to meet specific client needs.

I'm passionate about translating raw data into clear, organized insights that empower clients to make informed decisions.

My experience encompasses:

Developing and maintaining complex SQL integrations.

Managing end-to-end system installation projects.

Ensuring data integrity and optimizing database performance.

Collaborating with clients to understand their data requirements and deliver tailored solutions.

Troubleshooting and resolving database-related issues.

I'm driven by a commitment to delivering high-quality, data-driven solutions that drive business value.

I'm always eager to explore new technologies and challenges in the realm of database integration and project management.

TECHNICAL SKILLS

- **Amodat Ltd:** Microsoft SQL Server Administration & Development (2018–Present)
- **HackerU College:** MCSA, MCSE, CCNA, CCSA (2014–2016)
- **LFO Music School:** Sound Design & Audio Production (2010–2012)
- **ORT High School:** Full Matriculation, Computer Science (2007)
- **SQL Server:** stored procedures, functions, views, performance tuning
- **Windows Server:** IIS, FTP, ODBC, VPN, Active Directory
- **APIs & Formats:** JSON, XML, XLS, REST APIs, HTML, Python
- **Tools:** SQL Server Agent, SQL Server Profiler, SSMS, Postman, Visual Studio Code

PROJECTS

ERP Data Integration System (SQL Server)
